

Instructions

This tape measure is for use as a guide only. If it is used carefully it will give you a guide to your ring size.

1. Print this page out at 100% size - make sure you do not select any 'scale to fit page' or 'shrink to fit page' options.
2. Check print size – The boundary box should measure 18cm by 6cm. If not, your printer may have rescaled the image. If this is the case check your printer settings and print again.
3. Carefully cut out around the tape measure and cut the slot for the tape to pass through.
4. To make it easier to use, push the end of the tape through the slot before you put it around your finger.
5. Carefully pull it tight around the finger you are measuring in the place you would wear a ring.
6. Important: Do not pull it so tight you won't be able to comfortably take the loop off over your knuckle.
7. Once you think you have a good fit. Read off the corresponding letter and that should be your ring size.

Important: Remember that all your fingers are not the same circumference. You will need to take another measurement if you want to buy a ring for another finger.

Now you have your ring size, ordering is easy!
